

26<sup>th</sup> August 2017

**Reference: Piotr Burzynski Interim Programme Director**

Piotr worked for Rosti Poland in Białystok from November 2016 to August 2017. He organised and ran a major post acquisition integration programme. The programme involved the building of offices, a warehouse and assembly hall and the transfer of 75 moulding machines, 33 assembly lines and 450 staff. The move was planned within a tight time window between January to July and had to be completed without impacting deliveries to our customer base. The project was completed exactly to plan and completed on the 28 July 2017.

Piotr not only delivered the project objectives but managed the in-house team and trained them in the use of project management and project tools and methods.
